

IITIIMJobAssistant

(Phase 2 – Growth & Multi-Platform Application Agents)

DATED: 29th Jun 2026

Project Details: IITIIMJobAssistant – Phase 2

Engagement Type: Freelance

Total Project Value: ₹50,000

Milestone 1: Naukri Auto-Apply Agent

An agent that searches and applies to relevant Naukri jobs automatically on the user's behalf, using their own session and resume. Milestone 1 is broken into sub-milestones 1.1 and 1.2, each with its own scope, deliverables, acceptance criteria, and payment.

1.1 Naukri Login, Job Search & Match

Scope

- Log into Naukri using the user's own session / credentials — never a shared account
- Search and filter Naukri postings matching the user's profile, preferences, and target role family
- Rank matched jobs by relevance to the user's resume and preferences
- De-duplicate against jobs already applied to
- Handle session expiry and prompt the user to re-authenticate when needed

Deliverables

- Naukri login + session integration scoped to the user's own account
- Job search & relevance-ranking module against the user's profile
- Duplicate-application guard
- Documentation

(+91) 8587-030276
(+91) 9599-062587

hello@ mkixventures.com
mkixventures.com

New Delhi, Delhi,
110003

Acceptance Criteria

- Relevant Naukri jobs are discovered and ranked for the user on each run
- Zero duplicate jobs surfaced for application
- Session expiry is handled gracefully with a clear re-auth prompt

Payment	
Amount	₹4,000
Hours	8-10 hrs

1.2 Auto-Apply, Answer Bank & Resume Tailoring

Scope

- Auto-apply on the user's behalf using their saved profile, resume, and answer bank
- Answer Naukri screening questions from the stored answer bank; flag novel questions for user review
- Upload the correct resume variant per role family; generate a tailored resume per application from a shared template if provided, or fall back to the default resume
- Log every application with a screenshot + applied status for traceability
- Retry failed applications and alert the user on terminal failures
- Throttle applications to stay within safe daily limits

Deliverables

- Auto-apply agent with answer-bank handling and per-role resume selection
- Custom resume generator per application (shared template or default fallback)
- Submission log viewer with screenshot + applied status per application
- Failure queue for applications needing human completion
- Documentation

Acceptance Criteria

- At least 80% of matched Naukri jobs are applied to end-to-end without human input
- 100% of applications have a screenshot + status stored for audit
- Failures surface in the user's dashboard within 5 minutes with a clear reason

Amount	₹7,000
Hours	14-16 hrs

Milestone 2: Sales & Marketing Agent (LinkedIn ICP Discovery → Linkup Outreach → Conversion)

A two-part autonomous growth engine for IIT/IIMJobAssistant. The Research Agent discovers ideal customers (IIT/IIM graduates) on LinkedIn each day and scores them by fit; the Marketing Agent reaches out via Linkup, holds human-like conversations, handles objections, follows up, and converts prospects into paying subscribers — all tracked live in the Admin Console under a dedicated Sales & Marketing tab. Milestone 2 is broken into sub-milestones 2.1, 2.2, 2.3, and 2.4, each with its own scope, deliverables, acceptance criteria, and payment.

2.1 Research Agent – LinkedIn ICP Discovery

Scope

- Each day, search LinkedIn for the Ideal Customer Profile — IIT/IIM graduates in target roles (Software Engineer, Product Manager, Consultant, Analyst, Founder) across target companies and locations
- For every profile, extract name, headline / role, education, company, and location
- Assign a Match Score (0–100%) based on how closely the profile fits the ICP, and auto-queue qualified leads for outreach
- Run searches on safe, human-like pacing with daily caps to protect the LinkedIn account from rate limits or restrictions

ICP Match Scoring — Signals

Signal	Weight
IIT / IIM education match	40%
Target role / seniority	25%
Target company tier	20%
Location & activity signals	15%

Example: IIT Bombay + Software Engineer at Amazon, Bengaluru → Match 94% → auto-queued for outreach.

Deliverables

- Authenticated LinkedIn discovery module with configurable search filters and safe daily search limits
- ICP match-scoring engine with adjustable signal weights
- leads_research database table and a daily ideal-customer list feeding the Research Agent dashboard tab
- Documentation

Acceptance Criteria

- Ideal-customer list generated automatically every day for 7 consecutive days without manual intervention
- Match Score available for 100% of discovered profiles before hand-off to outreach
- No account restrictions triggered during the live test window

(+91) 8587-030276
(+91) 9599-062587

New Delhi, Delhi,
110003

Payment	
Amount	₹7,000
Hours	14-16 hrs

2.2 Marketing Agent – Outreach Engine (via Linkup)

Scope

- Send connection requests and a personalised first message to each qualified lead through the Linkup API, in a natural, human-sounding tone — never robotic or template-obvious
- Draw personalisation from each profile (education, role, company) so every opener feels individually written
- Follow safe daily send caps and human-like timing between actions

Outreach Stages

Stage	Action
Connection Sent	Personalised connect request
1st Message	Warm, tailored opener after accept
Awaiting Reply	Auto follow-up scheduled

Deliverables

- Linkup outreach module (connect + message) with per-account daily send caps
- AI personalisation layer generating a unique opener per lead
- Message log written to the conversations table and shown on the Marketing Agent dashboard tab
- Documentation

(+91) 8587-030276
 (+91) 9599-062587

hello@ mkixventures.com
 mkixventures.com

New Delhi, Delhi,
 110003

Acceptance Criteria

- Every qualified lead receives a personalised, non-templated opener
- Sends stay within safe daily limits; no account restrictions during the live test window
- All outreach is logged and visible on the Marketing Agent tab within 10 minutes

Payment	
Amount	₹6,000
Hours	12-14 hrs

2.3 Conversation & Follow-up Engine

Scope

- When a lead replies, hold a real, multi-turn conversation — answering questions, explaining the product, handling objections (price, trust, timing), and guiding the prospect toward buying a plan
- If a lead goes quiet, follow up intelligently (spaced, polite, varied) until the prospect either buys or clearly opts out
- Track every lead's sales-journey stage in real time

Sales Journey Stages

Stage	Meaning	Next Action
In Conversation	Active two-way chat	Explain value / qualify need
Negotiating	Discussing plan / price	Recommend best-fit plan
Nurture	Not ready yet	Spaced follow-up
Converted	Plan purchased	Trigger onboarding
No Response	Silent after follow-ups	Close / recycle later

Example: "Budget is tight" → agent offers Starter plan → stage moves to Negotiating → Converted.

Deliverables

- Multi-turn conversation engine with objection handling and human-like tone
- Smart follow-up sequencer with configurable cadence and stop conditions
- Live stage tracker powering the Marketing Agent tab (message sent, their reply, current stage, next action)
- Documentation

Acceptance Criteria

- Agent sustains coherent, on-brand multi-turn conversations without manual editing
- Every active lead always shows an accurate current stage and next action
- Follow-ups fire on schedule and stop correctly on conversion or opt-out

Payment	
Amount	₹6,000
Hours	12-14 hrs

2.4 Admin Dashboard Integration (Sales & Marketing Tab)

Scope

- Wire the Sales & Marketing tab inside the existing Admin Console to live data across four sub-tabs: Overview, Research Agent, Marketing Agent, and Lead Pipeline
- Show the daily ideal-customer list, every conversation with its replies and stage, and the full pipeline breakdown — updating in near real time

Deliverables

- Live data binding for all four sub-tabs with filters (date, segment, stage, reply status) and CSV export
- Daily-progress charts (ideal customers found, messages vs replies, pipeline by stage)
- Secure integration into the current admin authentication and audit log
- Documentation

(+91) 8587-030276
(+91) 9599-062587

hello@ mkixventures.com
mkixventures.com

New Delhi, Delhi,
110003

Acceptance Criteria

- All tabs render live data accurately and refresh without manual reload
- Filters and exports return correct, consistent results
- Dashboard access respects existing admin roles and is fully audit-logged

Payment	
Amount	₹4,000
Hours	8-10 hrs

Milestone 3: LinkedIn Job Section Agent

An agent that finds relevant posts in the LinkedIn Jobs section and, where the recruiter / job poster is available on LinkedIn, follows up with them on the customer's behalf. Milestone 3 is broken into sub-milestones 3.1 and 3.2, each with its own scope, deliverables, acceptance criteria, and payment.

3.1 LinkedIn Jobs Discovery & Relevance Ranking

Scope

- Search the LinkedIn Jobs section for postings relevant to the user's profile, preferences, and target roles
- Rank matched jobs by relevance to the user's resume and stated preferences
- For each relevant posting, detect whether a recruiter / job poster is available on LinkedIn
- De-duplicate against jobs already surfaced or actioned
- Operate entirely through the user's own LinkedIn session

Deliverables

- LinkedIn Jobs search & relevance-ranking module against the user's profile
- Recruiter / job-poster availability resolver per posting
- De-duplication against prior runs
- Documentation

Acceptance Criteria

- Relevant LinkedIn jobs are discovered and ranked daily for the user
- Recruiter availability is correctly flagged per posting
- Zero duplicate jobs across runs

Payment	
Amount	₹5,000
Hours	10-12 hrs

3.2 Recruiter Follow-up & Conversation Tracking

Scope

- Where a recruiter is available, send a personalised connection request and follow-up message referencing the specific role, on the customer's behalf
- Use resume + JD + profile context to personalise each outreach; match a natural writing tone
- Auto-reply to recruiter responses and escalate high-intent replies (interview, screening, scheduling) to the user's inbox
- Throttle and humanise pacing within LinkedIn safety limits; kill-switch within 30 seconds
- Track job found → recruiter identified → connection → message → reply per posting in the dashboard

(+91) 8587-030276
(+91) 9599-062587

hello@ mkixventures.com
mkixventures.com

New Delhi, Delhi,
110003

Deliverables

- Personalised recruiter outreach + follow-up engine (LLM-driven) on the user's behalf
- Auto-reply with escalation rules for high-intent recruiter replies
- LinkedIn session pacing guardrails + 30-second kill-switch
- Job & recruiter conversation tracker in the dashboard
- Documentation

Acceptance Criteria

- Recruiter follow-ups are sent only where a poster is available, and tracked live in the dashboard within 10 minutes
- Daily LinkedIn actions stay under 60% of safety limits; zero account suspensions during a 14-day soak test

Payment	
Amount	₹6,000
Hours	12-14 hrs

Milestone 4: Master CV Builder

A structured Master CV module where the user enters every profile parameter once — personal details, education, work experience, internships, achievements, positions of responsibility, certifications, and hobbies — creating a single source of truth that powers tailored resumes and auto-fills every application across Naukri, LinkedIn, and company forms.

Scope

- Provide a structured, multi-section intake form capturing the full CV: personal details (name, contact, LinkedIn, headline), academic profile (degree, institute, %/CGPA, year), work experience (company, role, project title, dates, responsibilities, achievements), summer internships, coursework / electives, positions of responsibility, awards & certifications, and hobbies

(+91) 8587-030276
(+91) 9599-062587

hello@ mkixventures.com
mkixventures.com

New Delhi, Delhi,
110003

- Support multiple repeatable entries per section (several jobs, internships, or degrees), each with its own bullet list of responsibilities and achievements
- Allow the user to add, edit, reorder, and save entries against their account, with field validation
- Let the user upload an existing resume to best-effort pre-fill the master CV
- Use the saved master CV as the single source of truth for resume generation and form auto-fill across all agents (Naukri 1.2, LinkedIn, company forms)
- Generate a tailored resume per application by selecting the most relevant experiences and achievements for the target role / JD, exported as a clean PDF from a shared template (or default layout)

Deliverables

- Master CV intake UI covering all CV sections with repeatable entries
- master_cv structured data model tied to the user account
- Resume upload + pre-fill parser (best-effort field extraction)
- Master-CV-driven tailored resume generator with PDF export
- Integration hooks so the Naukri / LinkedIn / form agents read profile + resume from the master CV
- Documentation

Acceptance Criteria

- A user can enter and save a complete CV covering all sections in one place
- The saved master CV is the single source of truth used by all application agents
- A tailored resume is generated from the master CV for a given JD without manual editing

Payment	
Amount	₹3,000
Hours	6-8 hrs

Milestone 5: WhatsApp & Email Notification Flow

A notification layer that keeps users and admins informed in real time over WhatsApp and email. Users receive service updates — a daily summary of jobs applied, verification approved, and key account events — while admins are alerted the moment a new account is created or submitted for verification, so approvals happen immediately.

Scope

- Send user notifications over WhatsApp and email for key events: account verified / approved, daily summary of jobs applied (Naukri + LinkedIn + forms), new recruiter / lead replies, and subscription / renewal reminders
- Send admin notifications whenever a new account is created, and whenever a user submits their account for LinkedIn verification — so the admin can review and approve immediately
- Compile and schedule a daily digest per user summarising applications submitted, replies received, and pending actions
- Integrate a WhatsApp Business API provider (e.g., Meta Cloud API / Twilio / Gupshup) and a transactional email service. Will be provided by the company.
- Use template-based, personalised messages with the user's name and relevant counts / links
- Respect user notification preferences and opt-out, and throttle to avoid spam
- Log every notification (channel, event, delivery status) for traceability

Deliverables

- WhatsApp + email notification service wired to platform events (signup, verification submitted / approved, application activity, replies, subscription)
- Admin alerts for new-account-created and verification-requested events
- Daily digest scheduler with a per-user job-application summary
- WhatsApp + email message templates with personalisation
- Notification preferences / opt-out and a delivery log
- Documentation

Acceptance Criteria

- Users receive accurate WhatsApp / email notifications for verification, the daily job summary, and key service events
- Admins are alerted within minutes of a new account creation or a verification request
- All notifications are logged with delivery status, and opt-outs are honoured

General Terms

- Payments will be released only after milestone approval, at the end of the month
- Any rework required due to quality gaps may delay or reduce the payout
- All errors and bugs will be resolved by the developer at no additional cost, until the product and feature are working without any issues
- Code ownership will remain with the company (Mkix Ventures / IITIIMJobAssistant)
- Strict confidentiality applies across all phases
- LinkedIn, Linkup, and Naukri access / credentials to be confirmed prior to the relevant sub-milestones
- All outreach and auto-apply flows must comply with LinkedIn, Linkup, and Naukri acceptable-use policies; safe sending limits are mandatory
- After successful delivery, maintenance charges will be decided separately
- Payment will be made by Mkix or its affiliated parties to the designated account
- In case a freelancer decides not to continue, they must provide a complete knowledge transfer session to the newly assigned MKIX resource, regardless of the time required.

Confidentiality Clause

All project details, data, code, algorithms, prompts, lead lists, outreach strategies, matching logic, KPI frameworks, user data, and related discussions are strictly confidential and must not be disclosed to any third party under any circumstances. These materials may not be used for personal purposes by any freelancer, employee, or third party associated with Mkix Private Limited. All such content constitutes the intellectual property of Mkix and may not be used without prior written permission from Mkix. Mkix can take legal action if found someone using its strategy, codebase, or user data outside the scope of this engagement.
